

# ANGLO-GERMAN TRADE PACT SIGNED

## SETTLEMENT OLD DEBT IS ASKED BY YARN MAKERS

Lancashire Manufacturers Refuse to Continue Exports Until Settlement is Made Past Shipments.

By HAROLD P. FRANKE  
Associated Press Writer

LONDON, Aug. 11.—Terms of a trade agreement between Britain and Germany under which arrangements were made for payment of debts and debts of £100,000,000 were made public last night, but the Lancashire yarn manufacturers refused to let the government's efforts to aid them.

The pact does not touch debts of £100,000,000 which the official assurances that "the government intends to press vigorously" against Germany. The Lancashire firms decided not to sell in Germany until the end of October.

The decision of the manufacturers keeps in effect a policy upon which they have been insisting since Aug. 1.

### BANK ARRANGEMENTS

Under the new agreements business initiated after August 20 can be paid in Germany through the Bank of England.

British and some British firms will be sold and paid into the crown's own bank by the Bank of England.

The government pointed out firms could not be compelled to use channels if they desire, since the agreement is not compulsory. The government has no lines of agreements made by Germany with other countries.

Emerson, president of the firm, expressed at a mass meeting at Manchester that he was gratified that importers and manufacturers agreed in an agreement not to sell until arrangements had been made with the two governments to pay old debts.

### YARN IS NEEDED

Germany was understood in informed circles to believe that the movement would result in her getting a much larger share of the market. Officials now believe the agreement can be used as a stepping stone toward a general commercial agreement.

The official debt issue remained unsettled after Germany agreed to pay £100,000,000 in loans in Great Britain in negotiations undertaken following the memorandum declared in June.

## CALLS STRIKE IN ALUMINUM

Forget to Get Off Train in It is Moving—One Narrow Escape

HALIFAX, Aug. 11.—Three passengers boarded a train here to bid farewell to another sister. Mrs. Mary E. Evans, 18, had just come home in Vancouver. Suddenly discovering the train had started the trio leaped for the platform.

A woman bystander caught the trio before they fell, saving them from the rolling toward the moving wheels and saved her from possible serious injury. Mrs. William Purcell sustained minor injuries and another sister who jumped Mrs. Evans' bangs emerged with a shaking up.

*All Alone  
He Seized  
A Pill-Box*

Sergeant George Harris Mullin, Light Infantry, Moosejaw, Sask., got the VC. "For most conspicuous gallantry and devotion to duty," he single-handedly captured a commanding post in tribal territory north of Simla, India, is a former Canadian and his mother Mrs. D. Mullin and two sisters and two brothers live here. Mrs. J. J. Smith, 17, is a former student in schools for Alberta at Edmonton. Another sister is in Ontario.

Mr. Mullin, a Royal Canadian

Infantryman, was serving in India and was causing heavy casualties to our forces and holding the area. He seized the sniper's post in front, destroyed the machine gun and took the gunner on to the top of the pill-box. He shot the two machine gunners and then captured the sergeant Mullin when rushing to another entrance and compelled him to give up his gun.

"His gallantry and fearlessness were unequalled by many and although rapidly exhausted by his purpose, he and his clothes riddled with bullet holes, continued to fight on for the machine gunner's sake.

"He fought on for his country and his purpose, and not only helped to save the situation but also indirectly saved many lives."

**THREE WOMEN INJURED FROM DARING JUMP**

OTTAWA STILL HAS BIG CUP

LONG BRANCH, Ont. Aug. 11.—The lieutenant governor's gold medal, presented to prize of flight, was won by David Lloyd George, Britain's war-time premier, the man, who, it was said, had been the first to shoot down a German plane in the First World War.

C.S.M. Harry Ralfe, formerly Blayney and member of the Ottawa team, was the second to shoot down a German plane in the First World War.

He was the first to shoot down a German plane in the First World War.

It was a brilliant exhibition of aerial skill and daring, with each pilot building up his past six months or more by the industry and imagination of G.H.Q. to view this thrilling prospect. It is not surprising that the spectators were captivated by the splendor of the landscape opened out to us via our cameras, and the chivalry of internationalism.

On the following day, however,

Hag and his team were overwhelmed. Mr. Blayney, Miller and I still remained

informed in the attack. He would also send out the 67th Division.

Admiral Jellicoe stated that

masses of cavalry contemplated

and their retreat.

**TAKEN TO TOWER**

The war policy committee was

wanted to be in the aerial tower

built up during the past six months

or more by the industry and im-

agination of G.H.Q. to view this

thrilling prospect. It is not sur-

prising that the spectators were

captivated by the splendor of

the landscape opened out to us via

our cameras, and the chivalry of

internationalism.

On the following day, however,

Hag and his team were over-

whelmed. Mr. Blayney, Miller and I still remained

informed in the attack. He would also

send out the 67th Division.

Admiral Jellicoe stated that

masses of cavalry contemplated

and their retreat.

**OPINION DIVERSIFIED**

Hag and that he had no intention

of entering into a tremendous

offensive involving heavy losses.

His plan was to remain without

the Germans but to keep the

war committee intact.

It must not be forgotten in

the first place that all the facts

that mattered were in the possession

of the Germans and they had

plete their scheme.

It was urged that the com-

mmander-in-chief should

keep the Germans busy at

attacks here and there on a lim-

ited scale.

He laid great stress on the "ex-

ecution" of the German army and

the importance of which he stated

that Messines had known we

were making every preparation for de-

fense.

**ATTENTION TO LOSSES**

When the war committee ex-

amined the apparent possibility

of great an operation

causing heavy casualties, which

was experiencing with man-power

which would be difficult to re-

place, he thought there was no ground for

him to call attention to the

losses he had suffered.

He called attention to the slight

ness of the losses we had sustained

in the Vimy Ridge.

In the latter case one

division, according to him, had

a depth of five miles.

If this attack

were to be made, it would be

impossible to replace it.

We did not know that the attack

had been made, nor did we

know what the possibility of

success was.

He was authorized to make a state-

ment that he had ordered

borrow funds since the first

of the year and that the work

program has been carried

out during that period.

**ROBBER TRIO GO TO TRIAL**

TORONTO, Aug. 11.—Albert Dorfman, 21, of the Almonte Robbers, and two others, were committed for trial Friday on charges of armed robbery in the Bank of Montreal stockyards branch here last July 29. Cash to the value of \$100,000 was taken.

The three robbers were arrested

in the city of Almonte, Ont.,

on Aug. 10.

The trial is set for Aug. 13.

Samuel Goldfarb, 21, of the

Robbers, was held without bail.

# ESKIMO KILLS WIFE'S LOVER: GIVEN FIVE YEARS

CHURCH HEAD  
PASSES AFTER  
LONG ILLNESS

Primate of Church of Eng-  
land, Most Rev. C. L.  
Worrell, Dead

HALIFAX, Aug. 11.—The Church of England in Canada has lost its primate, who died last night when death claimed Most Rev. Clarence Lamb Worrell.

The 81-year-old prelate had been ill in hospital here for more than a month, but had been improving and expressing a particular desire to be spared to attend the consecration of his successor, which is to take place on Sept. 1.

Blood transfusions given from time to time by medical attendants had gradually but recurrently hemorrhaged him until his strength and he died at 9:10 o'clock yesterday while his family group gathered around him.

The aged prelate's final illness was near. Only Friday morning he received a message from Prime Minister J. Massey Hart, who told him all regarding the length of his illness and expressed the hope that recovery would follow.

The prime minister's report said: "C. L. Worrell, your son, has been the last messages he dictated."

"I am a worker myself just like you," he said. "But my work is practically completed, and we are going to a worse world than we have known."

Through the protracted illness his mind remained clear, his spirit bright and still deeply interested in the great work of his church which he had helped to found.

When he was hovering between life and death, he talked to his family about the welfare of his church welfare. He faced the end of a life's work cheerfully.

At the annual meeting of the Nova Scotia diocesan synod in May he announced that it was his intention to resign. The reason he gave was that he was over my three score years and ten." He died before the election at the next general synod, he told the delegates.

**Bishop DePencier  
To Serve As Primate**

HALIFAX, Aug. 11—Most Rev. A. U. DePencier, Anglican Archibishop of Canada and Metropolitan of the Ecclesiastical Province of British Columbia, will serve as primate of the Church of England in Canada until the general synod meeting in蒙特利尔, Quebec, in October, to lead to Most Rev. C. L. Worrell, who died last night, it was learned here today.

**TWO CONVICTS  
SHOT, KILLED**

BATON ROUGE, La., Aug. 11.—Two convicts were today shot and killed by police here. The two, John Himes to have been shot and killed when 13 prisoners broke from the state penitentiary at Angola.

**Request Mayor  
Find Husband**

LETHBRIDGE, Aug. 11—Two Quebec girls, both requested Mayor E. H. Bennett to find them husbands for them.

Some girls are an Ontario girl who writes to His Worship urging that she find her a rancher husband. The report, while publicized, resulted in a number of other appeals.

Another girl, a Quebec wife who wants to get a man who is a farm settler in one of Ontario's farms.

Another girl, Manitoba's Mayne Harrison, "may have some eligible western husbands left on his list." She is 24, well educated, has a good record and loves western life.

Still another, Manitoba young woman makes a plea in behalf of the Canadian government to the mayor, and offers a constructive suggestion to His Worship. She is happily married to a western rancher, died a few years ago. She writes to His Worship, asking the widow, but does not know whether he can help her marry again. The address was supplied to the mayor for official investigation.

**Prairie Weather**

VICTORIA, Aug. 11—Baroness Veree, 79, has died. She is older and said to be the first woman to cross the Atlantic in a small boat. She had been a member of the crew of the ship that carried the Queen to Spain.

Tired of a sedentary tour, she left Canada with her husband, a friend and a maid, to cross the Atlantic in a 30-foot boat. The trip with her husband, dropping the permitted daily decline at the opening.

The market rallied and fluctuated violently in a day of trading that was the most active since the beginning of the year.

Courses ascribed by graders for the crop report to the Department of Agriculture show that the idle acreage scheme has been effective, but that the problem of effective channels of distribution still exists.

In 1930 she left Germany with her husband and a friend to cross the Atlantic in a 30-foot boat. The trip with her husband, dropping the permitted daily decline at the opening.

The market rallied and fluctuated violently in a day of trading that was the most active since the beginning of the year.

She prefers to make her journeys about the world in small freighters.

U.S. SHORTAGE  
WHEAT DENIED;  
CROP SMALL

Continued from Page One  
bushel, December at 88½ to 88½ cents and May, which yesterday was over the dollar mark, at 91½ cents.

**Smallest Crop  
In 30 Years**

By STEPHEN J. MCDONOUGH  
ANDERSON, Minn., Staff Writer

WASHINGTON, Aug. 11.—The smallest yield of grain in 30 years or more was predicted by the U.S. Secretary of Agriculture Henry Wallace yesterday. The reason was no danger of food shortage.

The drought's ravages affected the wheat crop, which probably will directly or indirectly the entire food supply of the United States and country.

For example, the crop reporting board forecast that year production of wheat would be only 160,710,000 bushels, a decline of more than 10 per cent from the 1933 estimate of conditions on July 1. The average yield of this important crop is around 2,500,000,000 bushels.

**WHEAT BETTER**

The wheat yield, to the surprise of many, has increased 600,000 bushels Friday over the July prediction at 400,000,000 bushels. But this is due to the lower price of wheat.

The crop looks both directly and indirectly, is rapidly paring the wheat supply. Millions of cattle and hogs are being slaughtered by the government, both because they are starving now from lack of feed and water, and because there is no food for them in the months ahead.

Wallace, although visibly concerned over the too enthusiastic crop reports, nevertheless has given the farm administration's surplus reduction campaign, said that the new crop will be smaller than the 1933 crop of 1,700,000,000 bushels.

The wheat crop is the largest and most important single item in the nation's agriculture.

Enjoy the Thrill of Fine Quality

# "SALADA" TEA

"Fresh from the Gardens"

## GENEROSITY BEST DOMESTIC VIRTUE

A girl asks me what is the one quality above all others that is most important in a husband. To which I immediately reply: GENEROSITY. And when she asks me why, I say: "Because it is the one quality that makes him accord her the same rights that he takes for himself; that makes him a man above his wife with his habits; that gives him the right to be generous, to be tactful, to be considerate, etc." MOTHER.

Answer—If your daughter has a husband who is generous, she need not be afraid to let him go where he wants to go. If he goes to Europe, she need not be afraid to let him go alone. If he goes to the Vatican in Rome, there is no need to be afraid to let him go alone. If he goes to the Pope's audience, with a black jacket and head veil. A husband who is generous will not feel bad about going abroad or for other daytime occasions. The husband who is generous will not feel bad about going to the beach two thin gowns. If he intends to go to the beach, he can't afford to go with extra shoes, laundry, changes of clothes, etc., etc.

Question—At a very early age, man still ask "permission" to smile?

Answer—When women are present in any social group and a man wishes to smile, he must have permission to do so. In some cases, he may be given permission in some such terms as "Do you mind if I smile?" There are many feminine cigarette smokers nowadays, but that does not mean that they are necessarily smokers. There are many men who do not smoke, but that does not mean that they are not smokers. There are many men who do not drink, but that does not mean that they are not drinkers. There are many men who do not gamble, but that does not mean that they are not gamblers.

A woman once said to a rich young man that she did not care if he could spend as she pleased. This particular woman had a good husband and wife, thrifty, industrious, a shrewd manager. She had just enough to make his fortune, but not 1 cent of it did he give her for her own use. She said, "I am a servant's wage, although he did the work of half a dozen cooks and housemaids and nurses, and seamstresses."

Another woman once put out a hand and kept your eyes on a man's wallet and see if it has a padlock on it. If it does, she says, "He gives it to a beggar, if he is niggardly in his tips. If he counts the change in his pocket, he doesn't marry him. He will make his mark of the kind of husband who does not care for his wife, who does not care for her, who does not care for her what she did with that. That means that there is more than being a miser's wife."

And don't marry a man who is emotionally stony. There are men whose hearts are led up as tightly as a string. They are hard-boiled, and when a woman has to break into with a hammer, they are hard-boiled, a pleasant thing. They are too niggardly, too miserly, too tight-fisted, too hard a wife a compliment, or tell her that they love her. They may be good husbands, but they keep their feelings locked away in a chilled-out shell. They are not good husbands, because of the stony souls, and the wives never get any good out of them.

Choose for a husband a man who is generous in his opinions, who is broad-minded and liberal in all his ways. Don't choose a man who comes from a life of avariciousness and petty tyranny. Many a man has been known to see that a man and woman cannot always look at a subject from the same angle. They may have the same tastes, and who will respect your individuality? Don't try to find a husband by stamp of your love. Above all, marry a man who is generous enough to let you have a real partnership of thoughts, instead of trying to monopolize all of the possibilities.

Believe me, daughter, generosity is a headliner among domestic virtues and bugs the best. SELL YOURSELF TO THE man.

DOROTHY DIX

### DAILEY TRUE STORY

#### IT'S LIKE THAT SOMETIMES

By Odysseus Kouros

The older inhabitants of Tuckerfield will tell you, with a smile, that the widow Mrs. Simpson is a good example of a woman who has to break into with a hammer, she is hard-boiled, a pleasant thing. They are too niggardly, too miserly, too tight-fisted, too hard a wife a compliment, or tell her that they love her. They may be good husbands, but they keep their feelings locked away in a chilled-out shell. They are not good husbands, because of the stony souls, and the wives never get any good out of them.

## SCIENCE SIMPLIFIED A Modern Gangster

Earth's Bullet-Proof Vest Wears Off Constant Bombardment

The earth, like a modern gangster, is possessed of a most effective bit of armor in the way of bullet-proof vest.

Somewhere back in time, perhaps in that period when the earth was born, a great deal of matter, ranging in size from small specks of dust to huge rocks, began circulating about the sun, much like the earth and the other planets. These particles cannot be seen through the telescope because of their relatively small size, but they do travel around the naked eye when they hit the earth's atmosphere.

Traveling at a terrific rate, through space one of these small stones enters the earth's atmosphere and friction immediately causes sufficient heat to cause incandescence. If the meteor is small it usually burns itself up before reaching the surface of the earth. If it is large it sometimes explodes or even buries itself in the earth.

Astronomers have estimated that there are billions of these small stars hitting the earth's atmosphere every day, but that the earth is bullet-proof against such bombardment by its bullet-proof vest.

The swarms of shooting stars, or meteors, in many cases are believed to be the remains of comets breaking up on impact, but for the most part they probably began their lives as small stones hitting the earth, being but smaller fragments of the material taken from

the sun in the process. We shall discuss this phase of the problem in another article.

## Sleepwalkers Do Strange Things

Sleepwalking is explained as a nervous condition in which only a part of the brain is acted. This condition is called somnambulism. The sleepwalker is highly subject to suggestion. He will often assume positions in his sleep, and even dream while he sleeps.

Some sleepwalkers have said that they can see distinctly, but they only partial control over their actions. Somnambulists (sleepwalkers) are easily aroused from deep sleep due to physical excitement due to personal or strange surroundings.

There is also a rare form of sleepwalking. There was a woman who walked on the roof of a hotel she was staying at when she was staying. A strong wind whipped her flimsy dress down to her feet. She kept a perfect balance. She walked calmly, as though she had been born to it. Had she been a doctor, physicians say the shock would have plunged her to the ground.

A German somnambulist was in the habit of swimming in the night, and the sound of his breathing disturbed his wife. He carried two or three clean shirts under his arms. He obtained a shirt, took off his clothes, and lay down in the garden. When the shirt had been neatly ironed, he awoke, still in his undershorts. The family was afraid to wake him. The following morning he always awoke as though he had had a clear shirt.

Dreams are unknown quantities. Freud, a doctor to modern Freudian theory, has been invested with mysterious significance. He can tell us what our dreams are. We are not to blame for our dreams. The dreamer is the one who wakes from the waking dream. The ability to will is lacking when one does not dream.

In a few seconds, this is true even when the events of a lifetime are in the dream. A scientist who took gas to have a tooth pulled was unconscious but did not dream. He had no memory of his experience. We are not to blame for our dreams. The dreamer is the one who wakes from the waking dream. The ability to will is lacking when one does not dream.

People are hurtful at things done in their dreams. Beasts of savage centuries grow through the mists of time and have no real knowledge of the world we live in. We are not to blame for our dreams. The dreamer is the one who wakes from the waking dream. The ability to will is lacking when one does not dream.

Dreams are sometimes a continuation of our dominant wants. The composer, for example, is said to have finished

## CONTRIBUTIONS

This page is for the young members of the community. It is intended for those from fourteen years upwards. You are invited to contribute news items, poems, short stories, plays, providing, of course, that they are not too long. They are not too long. You may submit them in typed or on one side of the paper only and give the name of the author and his age and address. In the case of poems, stories, etc., the contributors must have their contributions vouches for as to originality.

Add all contributions to The Editor, Young People's Page, The Bulletin, Edmonton.

## FIFTY DOORS ARE USUAL IN DYAK HOUSES

Borneo Natives Live in Communal Dwellings Like Ancient Iroquois

In Borneo the Dyak villagers, as a rule, live under one roof in a communal dwelling, rather than separate dwellings. In this respect they resemble the Iroquois who, in ancient times, constructed and lived in great communal houses of timber over a single floor, with openings, and like the Dyaks, applied the name "long house" to this structure.

Each long house, or "lamin" as it is also called, may accommodate 40 to 50 families, living on pillars of hard wood, usually the famous ever-enduring ironwood, and is approximately 100 feet wide and 400 feet above the ground.

It is a long, straight shed on stilts, and is divided into one-room apartments. Each one of these apartments contains a family, and there is one door to each apartment. The entrance to the house, therefore, is designated by the number of doors it contains.

### LARGEST APARTMENT

Thus the Dyak have, one speaks of a 25, 30, or 50-door house, as the case may be, instead of six, ten, or twenty-four doors, as in the case of a modern apartment house built in this country. The longest house that I visited was about 600 feet in length.

The general arrangement of all the Dyak village houses is about the same. A single log or beam of a notched log or ladder at each end of the long gallery, vestibule with a screen across the entire length of the building. This outer gallery is used for drying fish and drying padi and mate placed on its floor in the burning sun. It is here that the Dyaks are seen basking in the sun, wearing their breeching clothing, and washing seaweed wood for carving.

On the roof, the long hall, which is the soul of the house, is the perfect ending to the sonata. Tertius awake and went to bed again.

Frankie had a dream that he had dreamt. He called his composition "The Devil's Sonata," which was giving the devil more than he deserved.

## MIDGETS FORM SOFTBALL LOOP

Junior sport in the north and east sections of Edmonton is now having the added incentive of a North East Edmonton midget softball league.

The league is the result of the efforts of a number of young fellows interested in the adventure of playing baseball.

Three teams are playing for pennants and the games are being played at 6:45 at ground at Spruce Avenue, H. A. Gray school, 10401 82nd Street, and McHughon. The league will continue in operation till Sept. 1.

**Denton Rovers Beat Riverside By 4-1 Score**

Alberta Avenue, Rosedale and 104th Street are teams that competed in the summer league of the Midget section of the junior division of the Edmonton and District Football Association. The teams are playing a series of games that will carry them through till Sept. 1. The last game will be between the Dr. Walter Morris cup. The players are All young athletes, some being in their second year.

Frankie is the lead team in the league, having four points in the new season.

Then comes the Alberta Avenue team, having three points.

And last come the Denton Rovers.

The Denton Rovers are the lead team in the league, having four points in the new season.

A scientist who took gas to have a tooth pulled was unconscious but did not dream.

He was awakened by the sound of a shot. During his dream he had dreamed a drama covering years of time and endings with his own death.

Dreams are sometimes a con-

tinuation of our dominant wants.

The composer, for example, is said to have finished

his "Devil's Sonata" in a good

example. Tarquin had labored to the point of exhaustion on a difficult composition, and was about to give up. He had wanted to be a composer.

He had the last of his strength.

## HEAVY LOSSES CHALKED UP ON WHEAT MARKET

WINNIPEG, Aug. 11.—Bearish estimates of the United States wheat crop, the state of the French wheat market, and the Orléans report of Canadian crop conditions caused a strength of futures prices on the Winnipeg Grain Exchange today. Net declines for all fast-moving short contracts.

The last few minutes of trading were a period in which losses on commitments into the market. The heavy buying was concentrated in the greatest decline in month and in all futures at the day's bottom levels.

October wheat skidded to \$11.12, December to 98 1/2¢ and May to 92 1/2¢.

The United States government crop estimate, released yesterday, showed an increase of one million acres over the estimate issued one month ago. The new figure was accepted by traders. Liverpool wheat slumped to close 2 1/2 to 3 cents lower and Chicago wheat fell 1 1/2 to 2 cents.

Traders said for cash grain, short and coarse grains all fell off with wheat.

# CORONER'S JURY FAILS TO FIND CAUSE KRULYK DEATH

## Body Too Badly Charred To See Violence Marks

Mounties Report Iron Bar and Tools Found Near Body—Children Tell of Seeing Body Fall.

A coroner's jury, probing the death of John Kruliky, truck farmer at 127 Street and 127 Avenue, met yesterday morning, but the charred body was found in the ruins of his rared barn early on August 10, and the coroners were unable to definitely determine the actual cause of death.

The coroner's inquest may open for further findings which may result in charges of murder and other criminal charges, but the police are pressing investigation into all angles of the mysterious death.

The charred remains of the victim was an exhibit of an iron bar, about two feet long and half an inch thick, with a jagged edge. A piece of a piece of acute spring leaf, found within two feet of the body, while a hand and a portion of a leg were also lying on the floor near the same spot.

Dr. W. H. McGregor, assistant pathologist at the University of Alberta, who made post-mortem examination, said he had been so severely burned that he was unable to tell the exact cause of death. He said there was no violence to be found, he testified.

**FIRE OFFICIALS**

Det. Const. Chief James MacGregor, who stated he was called to the scene of the blaze about 2 a.m., said he saw smoke and unavailing attempts to save the building, which burned to the ground.

When he arrived at the Krulik place, he stated, he found the barn a mass of flames. Mrs. Krulik, standing near the fence, sobbing, he testified.

Nothing a form, apparently a man's body, inside the barn, he directed his men to play the water from the hose on the flames.

A log of lime was found in one corner of the barn which he said might have caused the fire.

There were no miners lying across the body, but the lower part of the barn was of logs and the main frame had gone.

In a sombre, unsteady voice, Mrs. Krulik, wife of the deceased, testified that she was awakened by a noise at 11 p.m. and heard Struth a light through from the barn and roused the children.

She rushed out to the barn but was pulled away by the children, who told her she should go to the nearest fire and phone the fire department.

Her husband went to bed about

## OREGON TOWN IN FIRE PATH

SPOKANE, Wash., Aug. 11.—Sweeping across 4,000 acres of farmland, a forest fire, which the state has declared a national forest today and threatened the small town of Friend, Ore., has been stopped.

Horn corps workers and volunteers fought the flames as reinforcements from the U.S. Forest Service and the Dales. The fire destroyed two groups of farm homes five miles west of it raced toward the national forest.

Other sections of the American Northwest enjoyed a respite from fire.

Mr. Snyder will be accompanied by J. Shuster, Billie, Connie, and wife, Mrs. Snyder, new here, is "one up" Mother Nature.

He has induced a mother house,

"deodorized" the animals, he explained, by removing their muck

and interests and forcing them to

"Why not?" he asked.

SECOND SECTION

EDMONTON ALBERTA—SATURDAY, AUGUST 11, 1934

## He'll Fire Tiny Rocket At The Moon

MAX COVINS.

Atmospheric filer, is shown in the Alberta Motor Association office yesterday were Mr. and Mrs. E. Donald, Dorothy, Mountain and Helen, Mount All of Moose Jaw, Sask.; Eddie P. Green of Watsonville, California; and Gordon E. Smellie.

Surplus of the city electric light department for the first seven months of this year totalled \$122,491 and the cost of power per kilowatt-hour for the corresponding period last year, City Comptroller Jim Hodson reported.

Electric power for the month of July was \$11,493 as against \$9,902 for July, 1933.

Visitors to Edmonton from out-of-town, who registered at the Alberta Motor Association office yesterday were: Mr. and Mrs. E. Donald, Dorothy, Mountain and Helen, Mount All of Moose Jaw, Sask.; Eddie P. Green of Watsonville, California; and Gordon E. Smellie.

Thomas Bushman, of Yonkers, N.Y., who has been spending the last three weeks here with his brother, Captain J. M. Bushman, left the city Saturday at the start of his long return journey by car to New York.

He was accompanied by his wife and child, a young nephew.

## Party of Naturalists Leaving Sunday for South Nahanni River Area

As miners are lured by reports of a gold strike to naturalists with news of the existence of unusual animals in any territory, it has been decided to make a trip to the West and Eastern Canadas that two birds of white mountain sheep exist along the waters of the South Nahanni River, and, according to party leader, C. C. Cookin' Lake, to determine the truth of the reports.

It may sound silly to you," stated Cookin' Lake, "but we want to know if this unusual animal for the National Museum of Canada is the American Mountain Sheep or the Natural History.

That is why we are going to Canada to find out what the reports are.

Now we can find the animals."

**Robbery Victim Became A Nutrist**

ST. LOUIS, Aug. 11.—It was a man, a drygoods sandwich shop attendant turned to greet a customer. To his amazement he saw a man (left) who had not, he later explained, been in the store, he said, and was forced to disrobe. A phone call brought friends to the rescue.

**Five Baby Skunks Adopted By Cat**

BOYD, Texas, Aug. 11.—Homeless and without a home here, is "one up" Mother Nature.

She has induced a mother house,

"deodorized" the animals, he explained, by removing their muck

and interests and forcing them to

"Why not?" he asked.

**Work For Clydesdale**

GLASGOW, Aug. 11—Good news for the Clydesdale in the form of a \$10,000 gift from the British 8,000-car motor-lease for the Antipodes service.

**Wooden Airplane**

LENINGRAD, U.S.S.R., Aug. 11.—A new amphibian seven-seater airplane built entirely of wood is being completed here by the Scientific Institute of the Civil Air Fleet.

It is able to take off from land, water and land and to land on water.

As well as endeavoring to get the white sheep, Mr. Snyder has a particular desire to kill six wild boar, three for the Canadians and three for the

North.

These will be mounted and presented by Mr. Snyder to these institutions.

He has mounted a group of wood in any museum in the world.

Mackenzie Air Services machine, with Leigh Brightwell at the controls, will fly to the country and will later proceed to the Rockies.

They will return from the north as well as endeavoring to get the white sheep.

Mr. Snyder will be accompanied by his wife, Mrs. Dorothy, and son, Peter, 10, and daughter, Mrs. Susan Atkinson, also of Bremner.

The funeral will be held at 4:15 p.m. from the United Church of Bremner district, where he has farmed since his arrival from Perry School in 1918, and died at his home early Friday.

He leaves his wife, Mrs. Dorothy, and son, Peter, and Mrs. Susan Atkinson, also of Bremner.

# ROYALS INCREASE LEAD IN SENIOR BASEBALL LOOP

## WADSWORTH LOSES FIGHT AT WEMBLEY

Great Canadian Fighter Is Beaten By Spit Decision

By THOMAS J. CHAMBERS

WEMBLEY, Eng., Aug. 11.—Lion Wadsworth of Hamilton was one of the most spectacular fighting men in the tournament, was without a doubt. Famous for his "tough right hook" and of a wild, unpredictable temper, he was easily regarded as one of the most dangerous men in the ring. He however officially relinquished his claim to the Canadian title in a final to clinch a rare cleanup in the ring by the home forces.

The British and Canadian boxer began to go down in defeat before the British away switch from the Canadian. The English South Africa won over each. The Canadian side and the British Welsh lightweight and middleweight fighters went into the ring three times, and they both lost the third time.

### WINNING CANUCKS

Eddie Headland, bananalike from Drummondville, Que., scored a necessary victory over Wade of South Africa in the first round, but was eliminated in the semi-finals by Barnes of Wales in the second fight. The Quebec boy barely survived.

James went down twice in the first fight, but held on.

Joe Marsh, Montreal lightweight, and Bill Malets, Bradford, Ont., however, did not even last round. Marsh was out with a broken nose, while Malets had a cut eye.

In the sixth, the Kingmen counted down to victory. They had been given one run gained by South Side in the seventh, they were good enough to win.

BUCK EATON GOOD

Buck Eaton was in masterful form to whip the South Siders. The Jeanneville fighter kept the four hits he allowed well under control, and let up at any stage. He struck out 10 batters and walked two.

Although he gave up no less than 10 runs, he still had the South Siders so well that Royals could get only a half-out-run of him. His strikeout total was 10, and he struck out two but three did not make it a single pass in first place.

Steve Donoghue, left fielder of the winners, was the big hitting of the game, with a single, triple, the plate, and one double.

Bill Croft had three strikes against the plate, but one double.

Victory put Royals in a race for

the top of the Senior League.

It is an interesting battle

between team and team which

much excitement may be ex-

pected in their battles.

Safeway Clash With Eskimos

At Boyce Street

The league-leading Safeways

League. The game will start at 6 p.m.

It is an interesting battle

between team and team which

much excitement may be ex-

pected in their battles.

## Buck Eaton Hurls Four-Hit Game To Defeat South Side

### Kingmen Overcome Large Lead to Score Win By 6-5 Count

By BILL LEITCH

Facing a strong contest, where their front enjoyed three runs in the first half of the fourth inning, the Kingmen's Royals came back with a great outburst of power to beat the South Side, 6-5, and clinched their hold on the Senior Baseball League championship.

Big guns of the Royals' hitting corps boomed irresistibly through the game, but the South Siders were by only a margin near, and finally ousted the South Siders by a count of 6-5.

The losers and inability to get the hits when they counted most kept the South Siders from winning from its premonition.

ERICK IS COSTLED

After Erickson was led at 1-1, he faced four more leads, but the South Siders got two men on bases and Paul dashed a hard drive to center, but Bert Croft let the ball get through his fingers and it was out.

That was a disastrous loss.

Buck Eaton, the model for the Kingmen, was the right man out.

He had a perfect right and 13 safe hits. Bert Croft speeded up his pace after the first game.

That was a brilliant performance.

In the sixth, the Kingmen counted down to victory. They had been given one run gained by South Side in the seventh, they were good enough to win.

BUCK EATON GOOD

Buck Eaton was in masterful form to whip the South Siders. The Jeanneville fighter kept the four hits he allowed well under control, and let up at any stage. He struck out 10 batters and walked two.

## The Old and The New

The growth of the business of the Edmonton Auto Parts Co. during the past nine years is well exemplified by this picture. The upper section shows the old premises occupied in 1925, while the lower picture shows the spacious new and improved premises now necessary to handle this firm's present business.

### Highest Garden

BERLIN, Aug. 11—After Europe's tallest building, the Berlin Tower, a small garden has been opened which claims the "highest" entertainment of its kind this side of the Atlantic. It has a real good-size grass plot and tennis courts, and it for those who wish to take a ride.

### RICH RADIUM MINE SOUGHT IN FAR NORTH

Young Canadian Plans  
Expedition Taking Him  
to Pole

PARIS, Aug. 11—The world's search may prove the most difficult ever made for radium, and to chart an airplane route to the far east, the Arctic. The young Canadian explorer soon will leave Paris to organize an expedition to the north pole.

He is Michael Hayes of Winnipeg, who has a team of experts in the field, and has been engaged to find a suitable place to start his search for radium deposits in connection with his plan for surveying the northern fields in the Arctic Circle said.

During one year, two seasons, in the Canadian north, he found no place in which he will now return, and has selected the Arctic as the best deposit. The region is between Baffin Island and Beaufort Sea, and the Canadian government will give him services which could be organized previous to his arrival in the region.

**ENFORCED TO BE JOINED  
BY FOUR COMPANIES**

Four companies have been forced to sell off from the present travel route to the Orient by this same Canadian, Hayes, who has been a member of the Canadian Arctic Expedition and has organized many scientific expeditions to the Arctic.

# Edmonton Auto Parts Co.

## Outgrowing Old Quarters Moves To New Location

**Expansion Provides New  
Commodious Plant on  
102 Street**

The heart of Edmonton's automotive centre has opened up to receive a healthy flourishing young business. The Edmonton Auto Parts Company has outgrown all its old facilities and by sheer growth is compelled to move to larger and more commodious quarters. It is the Edmonton Auto Parts Company, founded in 1925, which since 1925 has functioned as an internally important branch of the local motor works. It was in 1925 that the new quarters at 10260 - 102nd Street and 20th Avenue from premises at 1010 - 102nd Street, the Edmonton Auto Parts Company has taken over a little more than half a mile and now exclusively houses machine shops, stockrooms and offices containing far more equipment than could ever be provided in the former quarters which at some time had apparently been too small.

Messrs. Bob Duguid, Lorne Bell and Jimmy Dawson are the men who have directed the growth and destiny of the company through its active and progressive years. From 1920 until June of this year, business kept an average even tenor, with the number of cars and trucks continued to find a ready market among the local and incoming farmers' needs. Since June, however, under the pressure of the depression, business has increased largely, the firm going after country business and most of it from areas.

### NATIONAL ASSN. MEMBER

The Edmonton Auto Parts Company is a distinctive unit of the National Auto Parts Association and as such has full facilities for performing all types of automobile repairs and reconditioning. Standard parts and replacements, bearings, flywheel gears, connecting rods and jacks of the spacious new stockrooms and there are very few tools or pieces of equipment or materials or the necessary fittings which cannot be found upon the premises.

Complete reconditioning service is provided in one quarter of the space, while the other three-quarters being under the personal supervision of the general manager, Mr. George S. Campbell, of this work is enhanced by expert mechanics. Large parts take care of in all of machine work while Jimmy Dawson's work is the stockroom and office.

## CONSUMPTION OF GAS DROPS AS TAX JUMPS

**Increase of 25 Per Cent. in  
Four Years of Average  
Gasoline Taxes**

According to recent figures published by the Dominion Bureau of Statistics there has been a 25 per cent. increase in four years in the average gasoline taxes paid by motorists in Canada.

Study of the bureau's figures shows a decline in the consumption

JAS. DAWSON

BOB DUGUID

LORNE BELL

The machine shop is equipped for all lines of work. Rebuilding, reconditioning, general machining, line shafts, flywheel gears, connecting rods, springs, bearings, flywheel gears, connecting rods, rock washers, etc., to be used for general purposes.

**AVERAGE TAX**  
From 1930 to 1934, the average tax in Canada was 34¢ per gallon. This year the average is 87¢ per gallon which equals approximately one quarter of the average gasoline tax in the various sections of the Dominion.

Taking a three year average from 1928 to 1930, the average tax covering the total value of new cars produced in Canada at the average rate of 1930-1931, the total available, the average premium amount, \$81,097,312. In the same three-year period materials

of the gasoline almost simultaneously with the increase in the taxation of this product, which originally was 1¢ per gallon on the highways but which now in most provinces, is being absorbed into the cost of the gasoline.

Alarmed at the persistent increase in the cost of gasoline, governments throughout Canada are indicating to their respective governments that they will do whatever is necessary to the more extensive use of automobiles and that will react to the benefit of provincial treasuries.

ten per cent of the population—have paid out annually, an average of \$44,420,077 in gas taxes and licences or the equivalent of 20 per cent of the former figure; even though these business-building qualities will be fully maintained in the future.

**SELLING VALUE DOWN**  
While the gasoline tax has increased by 25 per cent, the selling value of cars at the works has also gone up, although from 1929 to 1930, the gasoline consumption has declined from over 600 million gallons in 1929 to 484,323,000 in 1930.

Alarmed at the persistent increase in the cost of gasoline, governments throughout Canada are indicating to their respective governments that they will do whatever is necessary to the more extensive use of automobiles and that will react to the benefit of provincial treasuries.
